THE CHARM OF MOTHERHOOD

Enhanced by Perfect Physical Health.

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly sare for hercelf. Of course, nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism unfitted for the trial of strength, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the pervous strain of caring for the child, and a distinct change in the mother results. the mother results.

There is nothing more charming than a happy and healthy mother of children, and, indeed, childbirth under the right conditions need be no hazard to health or healty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women will persist in going blindly to the trial.

Every woman at this time should rely non Lydia E. Pinkham's Vegetable compound, a most valuable tonic and ivigorator of the female organism.

RECORDS SHOW B. R. T. ECONOMY CUT BRIDGE CARS

Commissioner Kracke Comes Back at Them With Figures They Can't Deny.

nade public official records which rease of elevated service on the Brooklyn Bridge in December, 1914. over that of December, 1913. Commissioner Kracke says there is no lenying the figures, for the reason that they were taken from the official monthly report of the B. R. T. Itself. On Saturday Commissioner Kracke charged that the B. R. T. was not operating its maximum allowance of trains during rush hours on the Brooklyn Bridge. Yesterday the B. R. T. made a denial of the truth of the Kracke contentions, claiming an increased service during December, 1914, over the same month in 1913.

Commissioner Kracke now says that not only has the R. R. T. reduced its service on the Brooklyn Bridge, but on the Williamsburg as well. In substantiation of this statement the Commissioner gives out the following figures, which are the R. R. T. figures and therefore must be right:

No Needles to Change

The new Diamond Stylus, of course, does away with the bothersome process of changing needles that scratch, and after a short period of use, wear out valuable records.

The carefully rounded, highly polished diamond reproducing ball simply floats over the indestructible sound grooves of the New Edison Records without the slightest wear. The thousandth repetition finds both record and reproducer in as perfect condition as the first.

But the main value of the Diamond Stylus lies in the fact that it brings out all the delicate overtones that give character and richness to the tone. Without mechanical timbre or artificial sound, it creates that full, round lifelike tone peculiar to the Edison.
